WORK EXPERIENCE

Full Stack Developer

VASS Company

Mar 2024 - Present

- Developing a JWT authentication service for a portal in Adobe Experience Manager (AEM) using Java.
- Creation of custom components from scratch, including layout with LESS and functionality with JavaScript.
- Implementation of servlets and models in Java to manage communication between the backend and the frontend.
- Integration of external services through RESTful APIs to improve the functionality of the portal.
- Performing unit and integration testing, and technical documentation to ensure project quality and maintenance.

Computer Maintenance

OVERCLOCK PC

Sep 2021 - Apr 2023

- Diagnosis and repair of hardware failures, such as hard drives, RAM, power supplies, and motherboards.
- Installation, updating and configuration of operating systems and software on personal and office computers.
- Preventive maintenance of equipment, including internal cleaning, updating drivers and replacement of worn components.
